

EDS Advanced Solutions

## What's New at EAS

### Jim Hamilton Elected Victoria Advanced Technology Council Board Director – September 2009

*James R. Hamilton, EDS Advanced Solutions President, was elected to the VIATeC Board of Directors at the Council's annual general meeting at the Vancouver Island Technology Park on September 24, 2009.*

As one of VIATeC's newest board members, Jim Hamilton hopes to create new opportunities and experiences for EAS employees within the technology and business community in Victoria, Greater Victoria and the Saanich Peninsula. He is a strong advocate for bringing people and technology together and takes pride in working for the advancement of technology on Vancouver Island. He is keen to cooperatively work to strengthen and develop the local IT industry through the formation and sponsorship of user groups, technology forums, roundtable discussions and speaking engagements.

Jim's knowledge of technology development, coupled with his more than 20 years of IT industry experience, make him an ideal contributor to the VIATeC Board. His strategic thinking and general business savvy will bring governance expertise to the Board. His background in creating competitive go-to-market strategies and generating business growth through strategic relationships and new partnerships will serve the Board well.

"VIATeC is delighted to have Jim joining our Board," said Dan Gunn, VIATeC Executive Director. "The ICT sector is a key part of Victoria's tech industry and having an added representative for

that sector will prove very useful as the Board and staff strive to serve our technology companies. Jim has extensive experience as a technology leader and a robust personal network and we look forward to adding his perspective to our Board of Directors."

Jim also hopes to generate exposure and integrate EDS Advanced Solutions and HP Enterprise Services into the Greater Victoria technology sector even further to facilitate new business relationships to advance EAS' position in the marketplace. He believes that bringing people and companies together, sharing knowledge and resources, is what fosters innovation and technology development for the island...and for the future.

#### **About VIATeC:**

VIATeC's charter is to help facilitate the development of Greater Victoria as the global centre of excellence for advanced technology. Since VIATeC's inception in 1989, the Greater Victoria tech sector has grown to over 900 known technology companies employing more than 13,000 people and generating in excess of \$1.76 billion in annual revenues. Technology is the #1 private industry in Greater Victoria. VIATeC is intended to be the first place that people contact for information or assistance related to advanced technology in the area.
